

Wasif Ali

Senior Full Stack Developer · 10 years in production

wasifale@gmail.com · +92 321 3555 225 · linkedin.com/in/wasifali1 · github.com/wasifali ·
Lahore, Pakistan (UTC+5)

SUMMARY

Senior full stack developer with ten years of production Node.js and TypeScript. Backend lead for a 52-service ERP estate serving BMW Mini and Motorrad (200K requests/day), architect of a consumer marketplace past one million transactions, and author of a NestJS reference architecture reused across 20+ client projects. Cuts latency, cuts defects, mentors engineers across distributed teams.

EXPERIENCE

Full Stack Engineer · Ibanera

Jan 2025 – Apr 2026 · Full-time · Remote

- Designed, developed and maintained scalable web applications with React on the front end and Node.js and Go services behind them.
- Architected RESTful and event-driven APIs with a focus on performance, reliability and security.
- Built high-throughput, low-latency backend services in Go and feature-rich application services in Node.js.
- Integrated third-party services, authentication mechanisms and external APIs.
- Led technical discussions, mentored junior developers, and contributed to architecture and technology decisions.

Senior Full Stack Developer · Big Immersive

2021 – 2026 · Full-time · Lahore

- Led backend development of ERP microservices powering BMW Mini & BMW Motorrad digital platforms: 200K requests/day across 52 services.
- Architected and launched a consumer marketplace (React, Node.js) serving 50K+ users and processing 1M+ transactions.
- Designed Redis caching layers and RESTful APIs, cutting average response time from 1500 ms to 600 ms.
- Established a peer code review program and mentored 10 junior engineers, reducing post-release defects by 70%.
- Integrated wallet authentication (MetaMask, WalletConnect) into 15+ production applications; gas-optimised Solidity cut costs 10%.

Senior JavaScript Engineer · CreativeMorph

2019 – 2021 · Full-time · Lahore

- Delivered full-stack features for three Silicon Valley startup clients on aggressive release cycles.
- Built the OCR annotation platform (MERN) processing 1000+ images/month for 100+ clients.
- Designed a NestJS + TypeScript reference architecture reused across 20+ client projects.
- Earned the company-wide performance award twice in one year.

- Developed payment gateway integrations and CMS platforms for fitness and health apps serving 100K+ users.
- Built Angular front-end architecture with real-time WebSocket features.
- Automated production deployments with AWS and Jenkins, reducing release time from hours to minutes.

SELECTED PROJECTS

- **BMW Mini & Motorrad ERP** — Microservices platform behind two global marques. 200K requests per day sustained; -60% average latency, 1500 ms → 600 ms; -70% post-release defects.
- **Consumer Marketplace** — Web3 payments and ownership under a React front end. 50K+ users; 1M+ transactions processed; -75% page load time.
- **OCR Annotation Platform** — MERN pipeline for 100+ client teams. 1000+ images per month; 100+ client teams; 10+ h saved per week via webhooks.
- **Fitness & Health CMS** — Payment rails and CMS for 100K+ users. 100K+ users served; hours → min deployment time; 5 engineers trained.

STACK

Daily: Node.js, TypeScript, NestJS, React, MongoDB, Redis, REST APIs

Shipped: Angular, Go, Solidity, Web3.js, AWS, Docker, WebSockets, Jenkins

Working: Next.js, PostgreSQL, Datadog, Coralogix, Ethers.js, Polygon

EDUCATION & CERTIFICATIONS

BS Computer Science, PUCIT, Lahore, 2012 – 2016
